mail to [hi@renebieder.com](mailto:hi@renebieder.com)

The Campton family is a tribute to 20th-century geometrically constructed sans-serifs, such as Futura or Avant Garde. But Campton was not designed as an update of those modern classics, and does not strive for impersonal cleanness and neutrality. It is a purely contemporary creation, which represents today's duplicity: rational yet flexible, with quirky expressiveness.

# 500000

gt 24

The image features the text 'gt 24' in a large, white, bold, sans-serif font. The letters are set against a black background with a light gray grid. The 'g' is lowercase and has a thick, rounded stem. The 't' is lowercase and has a thick stem and a short crossbar. The '2' is lowercase and has a thick stem and a rounded top. The '4' is lowercase and has a thick stem and a sharp top. The text is centered horizontally. There are several overlapping circles of varying shades of gray and white behind the text, creating a layered effect. On the right side of the image, there are numerical labels: 700, 492, 0, and -200, which appear to be vertical axis markers.

46/46 pt

Earth is the  
third planet  
from the  
Sun.

---

22/25 pt

Earth is the third planet  
from the Sun and the  
only astronomical object  
known to harbor life.

---

12/15 pt

Earth is the third planet from the Sun and the only astronomical object known to harbor life. While large volumes of water can be found throughout the Solar System, only Earth sustains liquid surface water. About 71% of Earth's surface is made up of the ocean, dwarfing Earth's polar ice, lakes, and rivers. The remaining 29% of Earth's surface is land, consisting of continents

# INDUSTRIAL REVOLUTION

FROM 1760 TO 1840

BY JAMES MILLER

The Industrial Revolution was the transition to new manufacturing processes in Great Britain, continental Europe, and the United States, in the period from about 1760 to sometime between 1820 and 1840<sup>1</sup>. This transition included going from hand production methods to machines, new chemical manufacturing and iron production processes, the increasing use of steam power and water power, the development of machine tools and the rise of the mechanized factory system.

Output greatly increased, and a result was an unprecedented rise in population and in the rate of population growth. Textiles were the dominant industry of the Industrial Revolution in terms of employment, value of output and capital invested. The textile industry was also the first to use modern production methods<sup>2</sup>.
